Welcome to SoftEther VPN

Welcome to SoftEther VPN.

SoftEther VPN is the latest release of next-generation VPN communications software provided by SoftEther VPN Project that offers stability, flexibility and expandability. SoftEther VPN enables the user to safely create a high-performance Virtual Private Network (VPN) using an IP communications network, of which the Internet is the representative example. VPN technology can be taken maximum advantage of in fields ranging from communication for business applications to networks oriented toward individual and home use.

Please read the SoftEther VPN official manual to use the SoftEther VPN to its full potential for VPN communications.
