

Chart

```
/*
 * Usage: Chart(type, data, height, width, xaxis, yaxis, title, min, max, interval, id)
 *
 * Parameters:
 *   type : str (one of 'circulargauge', 'column', 'multiseriescolumn', 'line')
 *   data : list
 *
 *   (optional) height : num (default: 450)
 *             Height of chart in pixel or percent.
 *             If value is greater or equal to 1, then value represents pixel, otherwise
 *             it represents percent.
 *
 *   (optional) width : num (default: 450)
 *             Width of chart in pixel or percent.
 *             If value is greater or equal to 1, then value represents pixel, otherwise
 *             it represents percent.
 *
 *   (optional) xaxis : str (default: 'Y-Axis')
 *             Label for X-Axis.
 *
 *   (optional) yaxis : str (default: 'X-Axis')
 *             Label for Y-Axis.
 *
 *   (optional) title : str (default: 'Title')
 *             Label for chart.
 *
 *   (optional) min : num (default: 0)
 *             Lower bound for Linear Gauge chart type.
 *
 *   (optional) max : num (default: 100)
 *             Upper bound for Linear Gauge chart type.
 *
 *   (optional) interval : num (default: 10)
 *             Major interval for axis markers.
 *
 *   (optional) id : str (default: nil)
 *             ID for chart component. Used for listening for events and interacting
 *             with the component.
```

VERSIONS:

```
1.0      2-Feb-10    robertm    initial version
1.1      4-Mar-10    steveb     code clean-up
1.2      29-Mar-10   steveb     better handling of error conditions;
1.3      16-Jul-10   steveb     fixed improper data handling for 'pie'
```
