

TagDirectory

```
/*
 * USAGE:
 *
 * TagDirectory(pages, tagPrefix, columnCount, listPagesOptions)
 *   build a multi-column tag directory for a list of pages
 *
 * PARAMETERS:
 *
 * (optional) pages : list/map/str
 *   list/map of pages to list; if pages is a str, then it is used as
 *   defaults to list of subpages of current page
 *
 * (optional) tagPrefix : str
 *   only use tags with given prefix (e.g. 'category:dog'); defaults to ''
 *
 * (optional) columnCount : num
 *   number of columns to display; defaults to 2
 *
 * (optional) listPagesOptions : map
 *   options passed into the ListPages template for listing each column
 *   defaults to { sort: 'viewcount', reverse: true, style: 'bullets' }
 *
 */
