ToDoList

```
/***
    USAGE: ToDoList()
        Embed a TODO-list into a page.  The TODO list allows users to cre
        Items that are due are highlighted in yellow, items passed due ar
        list can be added to any page.  The information of the TODO-list

    NOTES:
        * only 1 TODO-list can be embedded per page
        * this template requires the DekiAPI script extension
        * this template requires the jQuery script extension

    CHANGE HISTORY:
        1.0
            * initial version
        1.1
            * show error message if dekiapi or jquery extensions are miss
            * verify if user is logged in or not; if not, disable add & u

        1.2
            * allow custom user list to be passed in
            * publish changes to a channel
***/
